

Responsive CSS, Flexbox Direction, Grid Transition of photo album and more

- **Flexbox:** flexible jinispati banate hole flexbox er kaj er ses nai.. Display flex pasapasi korbe eta jani.
 - **Justify-content:** center; eta center a content k niye jabe
 - Justify-content: end/ flex-end erokom value ache
 - " " space-between dile majher space maintain korbe browser window respect a
 - Space-around/space-evenly/ egula space thik korar jonno proyojon onujayi
 - Justify-content page er horizontal borabor kaj kore
 - **Align-items:** flex-start/center;
 - Page er vertical borabor kaj kore..
 - **Flex-grow:** ei property ta sadharonoto side menu bar toiri korar somoi use kora hoy. Sei khetre side menu bar fixed thake but paser ta page onujayi content ke adjust kor.
 - Flex-grow:1; flexible hoye jabe daner ta jodi duita box thake. Id use kore right er tao chaile fixed kora jai.
 - Order; ei property use kore box er order change kora jabe id change na korei. Order:1; order:2; diye
- **Flex-form:** display:flex; flex-direction: column; justify-content:center;
 - Input, button { font-size: 1.3em; margin-top: 15px; border: 1px solid; padding-left: 10px; } esb bade color iccha moto change kora gelo.. Kinba font-weight esb iccha moto korte hobe arki..
- **Grid:** grid mane graph vertical and horizontal. Calendar ba ei types er kichu banate grid use kora jai.. **Flex and Grid er moddhe tofat interview te thake.**
 - display:grid; grid akare sajabe
 - grid-template-columns: 200px 200px; sob elements guloke 2 columns a sajabe.. R jodi value 200px arekta bariye dea hoy tobe sob elements guloke 3 columns a sajabe.
 - Grid-template-columns: repeat(4, 200px); repeat korbe 4 bar 200px.
 - Soman vage sob columns vag korar jonne 1fr use korte hobe 200px er jaigai.. 1fr mane fraction.
 - Grid-gap: 20px; dile grid box er majhe gap dekhabe.
 - Grid onek boro topic tai documentation pore porei sikhte hobe..
 - [Getting Started with CSS Grid: Anatomy | Viget](#)
- **Responsive:** device and screen size onujayi element sajano.
 - **Media Query:** @media(max-width: 700px){

.food{ background-color: red; }
 .menu-container{ flex-direction:column; }

 }
 @media(min-width: 900px) {

.food{ background-color: green; }

 }

Eivabeo kora jai abr khub olpo kaje sudhu flex diyeo kora jai akhn seta dekhbo..

Now,

- Flex-wrap: wrap; ei property use korle by default kichuta responsive hoye jai.. But basically amra kono akta framework diyei responsive korbo jemon bootstrap/ tailwind.
