

Module 10: UI/UX CSS Debugging

UI/UX: Video 1-4 a kichu site er link dea hoyeche kivabe use korte hobe bujhano hoyeche.

- **Specificity:** sobsomoi last property tai kaj korbe.. Jemon,
H1{ color: red;}
H1{color: blue;}
Tahole blue color tai kaj korbe.. Ager ta overwrite hoye jabe
- Specificity rule onujayi akta normal tag k css a define kore style korle jei priority pabe tar theke jodi same tag a akta class use kora hoy tahole seita beshi priority pabe even class er poreo jodi id use kora hoy tobe aro beshi priority pabe r overwrite korte thakbe..
 - h1{ color: red;}
 - .header{ color: blue;}
 - #header{ color: cyan;}
 - Tahole html file a jodi h1 tag use kora hoy tobe header class priority pabe id na use hole.. Then id call korle sob overwrite hoye id er color e pabe html file er h1.
- **!important:** high priority pai term card er moto.. Use kora uchit na.. **Highly discouraged.**
- **Most specificity value: inline>ID>Class>Elements**
- **Custom Property:** nije theke property value set kora ba specific value change kora.
 - :root{ --main-color: slateblue;}
 - p{ color: var(--main-color);}
 - Ekhane jei main color declare kora hoyeche seta nijer dea nam. Etake variable o bola hoy.
- **BEM: Block, Element, Modifier**
